DETAILED ACTION

Claims 1-41 have been canceled. Claims 42-50 have been added and are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 42-44, 49 and 50, drawn to a method of treating cancer in a mammal comprising administering an effective amount of a HGF receptor antagonist to a mammal diagnosed as having cancer, wherein said receptor antagonist in a human, humanized or chimeric antibody, classified in class 424, subclasses 133.1 and 142.1.
- II. Claims 45-48, drawn to an HGF receptor antagonist which specifically binds to an HGF receptor, classified in class 530, subclass 387.1, 387.3, and 388.15.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP ' 806.05(h)). In the instant case the antibodies of Group II can be used in an in vitro diagnostic assay or in a process of raising an anti-idiotypic antibody.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1642

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
